Trilliant to Provide Smart Grid Solution for Festival Hydro and the City of Stratford, Ontario

Smart City Initiative Will Increase Energy Efficiency in City of Stratford

Redwood City, CA – September 21, 2009 –Trilliant Incorporated, a leader in delivering Smart Grid solutions that enhance energy efficiency, utility operations, and renewable resource integration, today announced that the company has been selected to implement the Smart Grid network to create a Smart City for City of Stratford, Ontario. The system will support Festival Hydro's 20,000 customers. The project will be completed with Capgemini, a leading provider of consulting, technology and outsourcing services for utilities worldwide.

"We are very pleased to provide a true Smart Grid solution to Festival Hydro and the City of Stratford," said Eric Miller, Senior Vice President, Solutions, Trilliant. "This project extends our already wide footprint in Ontario, and Canada generally."

The Smart City initiative is expected to increase energy efficiency and control in the city of Stratford by integrating the electric grid with communication networks, smart devices, and renewable generation.

About Trilliant Incorporated

Trilliant Incorporated provides hardware, software and service solutions that deliver on the promise of Advanced Metering and Smart Grid to utilities and their customers including improved energy efficiency, grid reliability, lower operating cost, and integration of renewable energy resources. Since its original founding in 1985, Trilliant has been a leading innovator in the delivery and implementation of energy management systems, including advanced utility wireless data collection for residential and commercial customers, demand response, time-of-use billing, and critical peak pricing initiatives. Trilliant currently has more than 200 utility customers including Hydro One, the single-largest Smart Grid implementation in North America.
