

## PRESS RELEASE

### **Telvent and Trilliant Demonstrate Interoperability of Key Smart Grid Elements**

*Integration with broadband network simplifies deployment of  
critical distribution grid automation technology*

**November 24, 2009** - Telvent (NASDAQ: TLVT), the IT company for a sustainable and secure world, and Trilliant Incorporated, a leader in delivering Smart Grid solutions that enhance energy efficiency, utility operations, and renewable resource integration, today announced successful interoperability between Telvent's suite of real-time monitoring and control solutions and Trilliant's SecureMesh™ communications infrastructure. This validated integration will increase reliability and lower the cost of operating electric distribution networks.

Key to the success of widely deployed distribution automation and control devices is a high-bandwidth, low-latency network that can handle a variety of end points with real-time performance and security. Now, utilities can perform in a secure way and condition-based monitoring of those assets.

Together, the solutions enable utilities to advance automation of electric energy distribution towards a true Smart Grid. By developing the capability to use broadband-scale, fully integrated networks with a range of substation and beyond-substation devices, Trilliant and Telvent have simplified deployment and greatly reduced the cost of network monitoring and control.

"Distribution grid automation is a major component of a holistic Smart Grid system that spans the Enterprise," said Andy White, President and CEO at Trilliant. "We're excited to be working with Telvent to help utilities realize the next generation of Smart Grid technology."

"This solution will increase the reliability and drive down the cost of owning and operating smart network devices," said Manuel Sanchez, Telvent's President and CEO. "With Trilliant networks running these devices, our customers can move their distribution grid automation to the next level."

---

#### **About Telvent**

Telvent (NASDAQ: TLVT) is a global IT solutions and business information services provider that improves the efficiency and reliability of the world's premier organizations. The company serves markets critical to the sustainability of the planet, including the energy, transportation, agriculture, and environmental sectors. ([www.telvent.com](http://www.telvent.com))

#### **About Trilliant Incorporated**

Trilliant Incorporated provides hardware, software and service solutions that deliver on the promise of Advanced Metering and Smart Grid to utilities and their customers including improved energy efficiency, grid reliability, lower operating cost, and integration of renewable energy resources. Since its original founding in 1985, Trilliant has been a leading innovator in the delivery and implementation of energy management systems,

including advanced utility wireless data collection for residential and commercial customers, demand response, time-of-use billing, and critical peak pricing initiatives. Trilliant currently has more than 200 utility customers including Hydro One, the single-largest Smart Grid implementation in North America.
